

NexPoster Glass

High-Resolution

High-Brightness

Excellent Transparency

Durable

7mm Slim

Cloud CMS

NexPoster Glass is an innovative technology for retail showcase advertising, featuring smart LED pixels embedded in tempered glass. Combining high-brightness and high-resolution with excellent transparency. Easy to install and setup and supporting a standard 9x16 image ratio managed through a centralized cloud content system, NexPoster Glass is an ideal advertising solution for retail spaces.

Model	Pixel Pitch	Resolution	Transparency	Brightness	Power Consumption	Power Input	Weight
NPG3.4	3.4x3.4mm	400x230	60%	4000-4500nit	Max/Avg 750w/380w	AC100V-240V	26kg

High-Resolution

With high-resolution output, the NexPoster Glass delivers stunning, high-quality graphics that remain clear and vibrant, making your content stand out in any environment.

High-Brightness

Designed to impress and capture attention, the NexPoster Glass shines with an impressive 4500 nits of brightness, ensuring visibility even in direct sunlight.

Excellent Transparency

LEDs embedded in a safety glass panel provide over 60% transparency. Capture more attention for your products and messages with the NexPoster Glass, offering a sleek and modern alternative to traditional window posters.

Durability

Tempered glass lamination provides robust resistance against impact and stains, and its easy-to-clean surface ensures effortless maintenance. This combination of durability and convenience makes it an ideal choice for retail stores.

7mm Slim

Low-profile build and ultra-slim 7mm glass depth – daylight-friendly displays that blend seamlessly into any environment.

Cloud CMS

The NexPoster Glass includes iGotcha Signage Cloud-Based Content Management Software (CMS) for remote management and deployment of your content to one or many posters, all within an easy-to-use interface.
